

APPLICATIONS

The company boasts of being a specialist in production of Black masterbatches, which are approved in various high end applications for diverse industries like Automotive, Potable Pipes, Agriculture, Healthcare, Consumer Goods, Tanks, Industrial Packaging, Textiles etc. A part of Black masterbatches, company has a proven & exhaustive range of over 10,000 shades of Colour, White, Additive masterbatches and Compounds.

PREMIUM **TECHNOLOGY** FOR PREMIUM **PRODUCTS**

SAMRATMASTERBATCH PVT. LTD

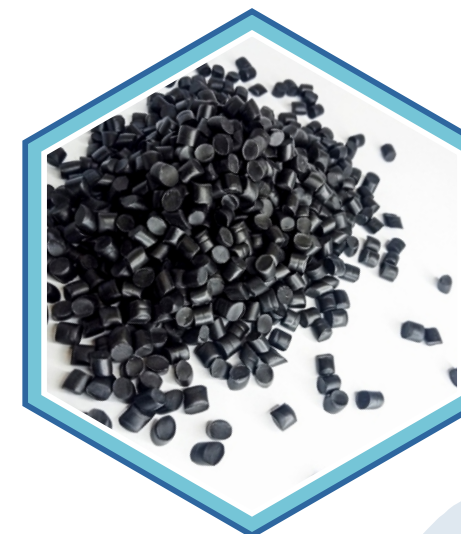

Mfg : Colour Masterbatch & Filler Compound
Plot No - 1, Survey No - 353P2 & 354P3, Village Modpar,
At. Modpar, Dist. Morbi - 363641 (Gujarat) India
Ph.: +91 82387 77477 | M.: 98981 15132

www.samratmasterbatch.com

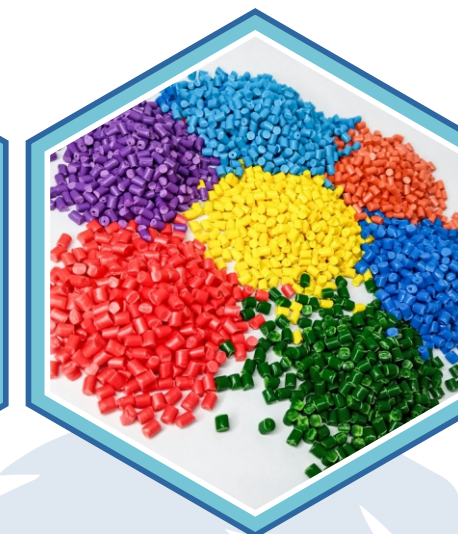

SAMRAT, promoted by entrepreneurs with rich experience in the polymer industry for more than four decades, is a leading manufacturer of masterbatches and compounds, known for our quality and commitment. Having an extensive range of masterbatches and mono pigment concentrates for various applications, SAMRAT has a substantially wide customer base in India and the international market.

Since inception, we have dominated product design and development to provide customized solutions for various applications. Our manufacturing innovations and flexibility have helped us give comprehensive market-driven solutions that conform to global standards for the polymer industry. Our diligent and dedicated team of professionals and technical experts are always keen to take up challenges for any new product development, that creates a benchmark for the industry. SAMRAT is all about 'Creating Possibilities'

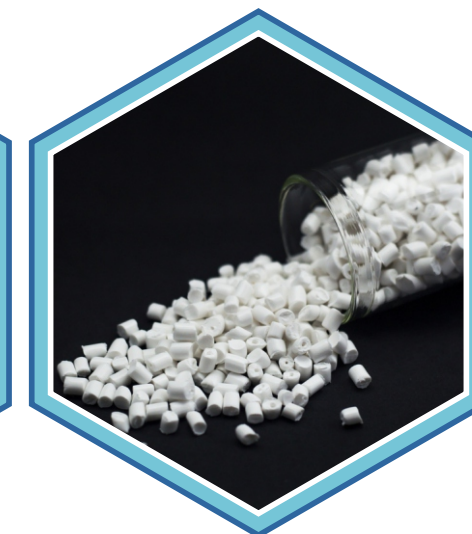

BLACK Materbaches

10% to 60% Carbon Black loading, Reach and Food Contact Approved

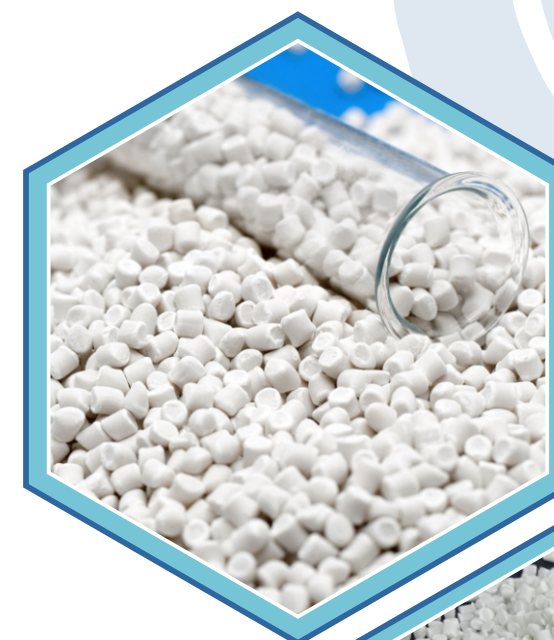

COLOUR Materbaches

Reach, RoHS and FDA Compliant, high pigment loading, fine dispersion, superior consistency

ADDITIVE Materbaches

UV Masterbatch, PPA Masterbatch, OB Masterbatch, Slip Masterbatch, Antistatic Masterbatch

FILLER Compund

PP Filler

Enhances strength, rigidity, and thermal stability of polypropylene.

LLDPE Filler

Improves properties and reduces costs in LLDPE.

Brighter

Increases brightness and visual appeal of polymer products.

TPT Filler

Boosts performance and durability of thermo-plastic elastomers.

Liner Filler

Increases strength and durability in liners.

Sodium Filler

Adds strength and durability with sodium-based compounds.

Lamination Filler

Enhances adhesion, strength, and durability in lamination processes.
